Best Matching Job Roles:

- Frontend Developer
- Full Stack Web Developer
- React Developer
- Next.js Developer
- UI/UX Engineer
- Web Application Developer

Improvement Suggestions:

Clarify the 'Pass 11 Plus under JMS Provider' experience entry to more distinctly separate the company name (JMS Provider) from the project/client (Pass 11 Plus), e.g., 'JMS Provider (Client: Pass 11 Plus) - Full Stack Web Developer'.

If seeking roles heavily dependent on Python or Express.js, consider adding specific project examples or responsibilities where these skills were actively used to provide more context.

Elaborate on your experience with databases (SQL Server, PostgreSQL) by describing
